Sustainable and responsible management and re-use of degraded peatlands in Latvia

LIFE REstore
LIFE14 CCM/LV/001103

Nature
Conservation Agency
Republic of Latvia

About the Project

- Project location: Latvia
- Budget: 1 828 318 EUR
 - EU contribution: 1 096 990 EUR
 - Own contribution: 177 040 EUR
 - State budget: 554 288 EUR
- Duration: 09.2015 – 08.2019
- Beneficiaries:
 - Coordinating – Nature Conservation Agency of Latvia
 - Associated – SFRI Silava, Latvian Peat Association, NGO Baltic coasts

Administration of
Latvian Environmental
Protection Fund

Nature
Conservation Agency
Republic of Latvia

Objectives and main activities

To develop recommendations for sustainable use of degraded peatlands

- To perform an inventory of degraded peatlands and to develop a database of degraded peatlands
- To approbate the methodology for GHG emissions accounting in accordance to IPCC guidelines “Wetlands” in order to elaborate country specific emission factors and contribute to National GHG Inventory improvements
- To develop a decision support tool – a map based land use optimization model for re-use of degraded peatlands
- To test and to demonstrate the optimisation model by implementing land-use scenarios and management in selected demonstration territories

Dabas aizsardzības
pārvalde

Current situation and results (1)

Inventory

- ~ 180 objects, ~ 50 000 ha, incl. ~ 26 000 ha abandoned peatlands
- On site assessment of biodiversity, peat layer and composition
- Integration of data and development of data base

Approbation of GHG emission methodology

- Closed chamber method
- 41 site all over Latvia
- 24 months

Nature
Conservation Agency
Republic of Latvia

Current situation and results (2)

- Nature Reserve Lauga Mire: restoration of hydrological regime
- Kalna peatland: implementation of cranberry crop
- Kemeru Mire: renaturalization by profiling territory and sphagnum planting
- Kaigu peatland: implementation of high-bush blueberries crop
- Kaigu peatland: afforestation

Republic of Latvia

Further actions

- Development of data base of inventory
- Implementation of land-use scenarios in demo-sites
- Economic assessment of ecosystem services of peatlands
- Development of optimization model and recommendations
- International conference for degraded peatland management and re-use
